PROFESSIONAL SUMMARY

I build full-stack software that works in the real world. I Passionate about building efficient and production ready solutions. I am always eager to learn new technologies, refine my skills, and take on challenging projects. My goal is to become a highly skilled engineer, gain hands-on experience in software development, and contribute to impactful solutions.

WORK EXPERIENCE

Periodic, *Telegram bot/miniapp developer*   10/2024 – 03/2025
- Created an assistant bot + miniapp on Telegram for managing tasks within an online group utilising Node.js.
- Implemented features allowing private channel management using task assignment, user registration, subscription manager using TON as payment , and other features.
- And work also as a tech support.

Brana software solution, *FullStack developer*   06/2025 – Present │ Addis Ababa

- Develop customizable ERP software.
