

Abubeker Abe

Full-stack developer

✉ abubeker4310@gmail.com ☎ +251943109147 📍 Addis Ababa, Addis Ababa 1000 🔗 abuki.tech

PROFESSIONAL SUMMARY

Full-stack developer with 2+ years of experience designing and building production-grade web, mobile, and custom software solutions. Skilled in React, Next.js, Node.js, Nest.js, and React Native. Contributed to fintech and AI SaaS products in multiple development roles and successfully shipped two mobile applications to the Google Play Store.

WORK EXPERIENCE

Brana software solution, *FullStack developer*

06/2025 – 06/2026 | Addis Ababa

- Architected and led development of a multi-tenant SaaS ERP platform from 0 → 1, adopted by 5+ enterprise clients.
- Led a team of 5 engineers: ran sprint planning, conducted code reviews and defined coding standards.
- Shipped 2 React Native mobile apps to the Play Store and App Store.
- Built and scaled core features for a large AI SaaS application.

Freelance, *Backend Developer*

09/2024 – 03/2025

- Designed and deployed a Telegram bot platform for private channel management, scaling from 0 to 5k+ subscribers in 3 months.
- Built a subscription billing engine with webhook driven state machines supporting Stripe, local payment providers, and stablecoin payments.

EDUCATION

Addis Ababa University, *B.S.C Computer Information Science*

01/2023 – 04/2026

SKILLS

Languages (JavaScript, TypeScript, python, c++, solidity) | **Frontend** (React.js, Next.js 14 (App Router), Tailwind CSS, Zustand, React Query, Storybook) | **Mobile** (React Native (CLI & Expo), Android Play Store & Apple App Store deployment) | **Backend** (Node.js, NestJS, REST APIs, WebSockets, Redis, BullMQ, Prisma, TypeORM) | **Databases** (PostgreSQL, MongoDB, Firebase, Supabase, Redis) | **AI/LLM** (OpenAI API, Gemini API, LangChain, prompt engineering, AI workflow design) | **Payments** (Stripe, Polar, Chapa) | **Blockchain** (Solidity, Foundry, Web3.js, ERC-20/721 standards, Stablecoin design) | **DevOps/Tools** (Vercel, Azure, AWS, Docker, VPS, GitHub Actions, Cypress)

CERTIFICATIONS

Winner of hackathon (SIS) | Google developer student club mentor certificate |
INSA summer camp graduate certificate | 4th place in Yagout payment SDK challenge

PROJECTS

Addis-Fetch

- A user-friendly P2P mobile app designed to connect travelers with individuals looking to receive items from abroad.
- Our platform facilitates connections, enabling travelers to bring requested items directly from other countries.

ETBX

- A full-stack stablecoin infrastructure pegged to the Ethiopian Birr.
- Built ERC-20 smart contracts with minting/burning mechanisms, on-chain collateral management, and a developer SDK (npm package) for dApp integration.
- Includes a Next.js admin dashboard for treasury management and real-time on-chain analytics.
